

IN THE SPECIFICATION

Please amend the specification as follows:

Page 3, second full paragraph (beginning at line 8):

The invention is also embodied in a method according to claim 1, wherein a cup is chosen that comprises an essentially flat wall panel. Such a cup is flexible because of the mechanical properties inherent in an essentially flat panel forming part of a body, in this case the cup.

Please add the following paragraphs on a new line beginning at page 3, line 30:

Brief Drawing Descriptions

Fig. 1 is a graph showing $\Delta P - \Delta V$ with homogenous temperature T.

Fig. 2 shows a photograph of prior art LE CARRÉ cans filled and sealed according to the prior art; cans according to the present invention may be LE CARRÉ cans, if their preparation is changed to include the method of the present invention, but are not limited to LE CARRÉ cans.
